

High performance. Delivered.

Accenture Innovation Center for SAP Accelerating analytics and mobility solutions

Accenture and SAP build industrial-strength solutions across the Accenture Innovation Centers for SAP network. At the newest addition to this network, Accenture and SAP specialists are working side by side to enhance existing applications and to develop the next generation of industry-specific analytics and mobility solutions.

Based at Accenture Technology Labs in San Jose, California, this brand-new center constitutes a rich environment for advanced solution engineering, as well as the perfect setting in which companies can gather to explore the latest technological solutions to persistent business challenges.

Structured as a factory for accelerated development, the Innovation Center brings together exceptional assets from both SAP and Accenture:

- SAP's completely integrated technology platform features:
 - Business intelligence
 - Mobility
 - Enterprise content management
 - Enterprise information management
 - Enterprise performance management
 - In-memory

- Accenture's featured solutions include industry-specific applications for:

- Utilities
- Customer Value Management
- Business Analytic Applications
- Retail
- Financial Services
- Oil & Gas
- HANA
- Health Care
- SAP BusinessObjects
- In Memory Business Warehouse

The presence of Accenture and SAP specialists collaborating in the same physical space creates an ideal setting where clients can interact with SAP technologists, see working demonstrations of advanced analytics and mobility solutions, and watch demonstrations of enhanced industry-specific tools. Companies can turn their visits to the Innovation Center into opportunities for strategic brainstorming on how they can use analytics and mobility solutions in their enterprise.

Leveraging these assets, skilled professionals from Accenture and SAP work together to craft enhancements and create entirely new industry-specific SAP solutions. Their work is enriched through direct links to the Accenture Technology Lab global network and its team of technologists who are exploring new and emerging technologies to invent the next wave of business solutions.

• Consulting • Technology • Outsourcing

Accenture Innovation Center for SAP San Jose, California

Companies visiting the Accenture Innovation Center for SAP physically or virtually will have direct access to the most experienced Accenture and SAP technologists in analytics and mobility solutions. About Accenture Innovation Centers for SAP

Accenture's alliance with SAP spans more than three decades, including collaboration across all industries and over 20 years of joint-solution development with SAP and clients. At Accenture we have two Innovation Centers for SAP focused on such development:

- Founded in 2005: Virtual Accenture Innovation Center for SAP Technology, formerly located in Walldorf/Germany.
- Founded in 2009: Accenture Innovation Center for SAP in Bangalore (India)

Both centers are innovation and development hubs, supporting continuous innovation, industrialization and thought leadership around existing and emerging SAP-based technologies.

As well as new and cutting-edge research and asset development, the centers work with clients to develop client-specific solutions (such as SOA-based solutions) and are an innovation hub for learning, modeling and developing new SAP technologies. One way they achieve this is creating development and technology and architecture templates. The centers are an integrated part of our Innovation Network, working in close collaboration with the Accenture Technology Labs, Global Delivery Network, Centers of Excellence and Industry Solution Centers.

About Accenture

Accenture is a global management consulting, technology services and outsourcing company, with approximately 204,000 people serving clients in more than 120 countries. Combining unparalleled experience, comprehensive capabilities across all industries and business functions, and extensive research on the world's most successful companies, Accenture collaborates with clients to help them become high-performance businesses and governments. The company generated net revenues of US\$21.6 billion for the fiscal year ended Aug. 31, 2010. Its home page is www.accenture.com.
